

## Trade/Industry Sample Lesson Plan

Date: August 01, 2009  
Topic: General Safety Instructions  
Prepared for: (Class Name/Section #)  
Submitted by: (Teacher Name)

TIME: 55 Minutes

### Warm Up:

Review general operator safety rule and regulations.

### Instruction:

To students:

1. Study the safety rules and regulations contained on the following pages in your textbook: pages 150-155.
2. Watch the short film.
3. Take the quiz on page 156. Students who receive 90% or less on the test will not be allowed to work in the shop and will need to retake the safety test after reviewing the assignment.

### Presentation:

- a. Shop safety
- b. Tool safety
- c. Operator safety

Practice: Guided Shop Tour

- a. Point out tools and show students the RED lined or DANGER zones.
- b. Instruct students not to enter these areas without the teacher.
- c. Show students the proper operating and emergency procedures.

Evaluation: Give students oral quiz on rules and regulations.
